

The house of industrial rubber

Al Omran
Rubber Trading L.L.C

Al Omran manufactures products made from Natural Rubber as well as all types of Synthetic Rubbers. The products include O-Rings, Quadrings, Bellows, Metal to Rubber Bonded products etc., as per customer requirement.

Al Omran can also manufacture products made from Speciality Polymers like FKM (Viton A, Viton B, Viton GLT and Viton GF), Fluorosilicone Rubber, FFKM (Kalrez Equivalent) etc.

Speciality polymers have a service temperature ranges from -65°C to $+300^{\circ}\text{C}$.

O-Rings resistant to Explosive Decompression (AED and RGD) and sour gas can also be manufactured.

Al Omran has a well equipped lab, inspection facilities and technical experts to suggest to customers best material as per their unique requirement.

Al Omran has a very wide range of production capabilities. We are one of the rare companies manufacturing both Rubber as well as Engineering Plastics products.

We also have the facility to develop and produce the metal inserts for rubber to metal bonded components in house which assist our clients to procure their entire requirement from one facility.

Custom moulded components are made from tooling based on Customer drawings

Customised rubber products are made from a wide range of elastomers with formulations to provide Superior strength, Durability, Chemical Resistance, Resilience etc The properties of our custom moulded rubber parts make them ideal for applications where customers require customised solutions.

Materials used :
Natural, Nitrile, Silicone, FKM (Viton A), Neoprene, EPDM, HNBR and SBR

Engineering plastics have replaced many metal, rubber components in the industry because of their Light weight, Heat resistant, Wear resistant, Self Lubrication and Cost effective properties.

We stock PA (Nylon), PTFE (Teflon), PP, UHMW-PE, Hylam, PU, POM, PET and PEEK rods and sheets, we can also manufacture customised components as per your drawings, samples or design components to suit your application.

Al Omran stocks an entire range of rubber sheets, this includes Natural, NBR, Silicon, EPDM, Viton, Neoprene etc.

Rubber sheets have various properties like anti skid, anti-vibration, chemical resistance, heat resistance, abrasion resistance, electric non conductive etc.

Rubber Sheets are used in almost all industries for various purposes. The diversity of this product makes it a very versatile and commonly used product.

Rubber Sheets are also used for Making Gaskets, Rubber Skirting, Chutes etc.

We stock a wide range of transmission Products such as

- Gear Coupling
- Disc Coupling
- Micro Coupling
- Rubber Coupling
- Tire Coupling
- Wire Drum Coupling
- Grid Coupling
- Jaw Coupling
- Flexible Coupling
- Brake Drum Coupling
- Universal Joint
- Wind Power Coupling

O-rings are one of the most commonly used seals in machine design because they are inexpensive, easy to make, reliable, and have simple mounting requirements.

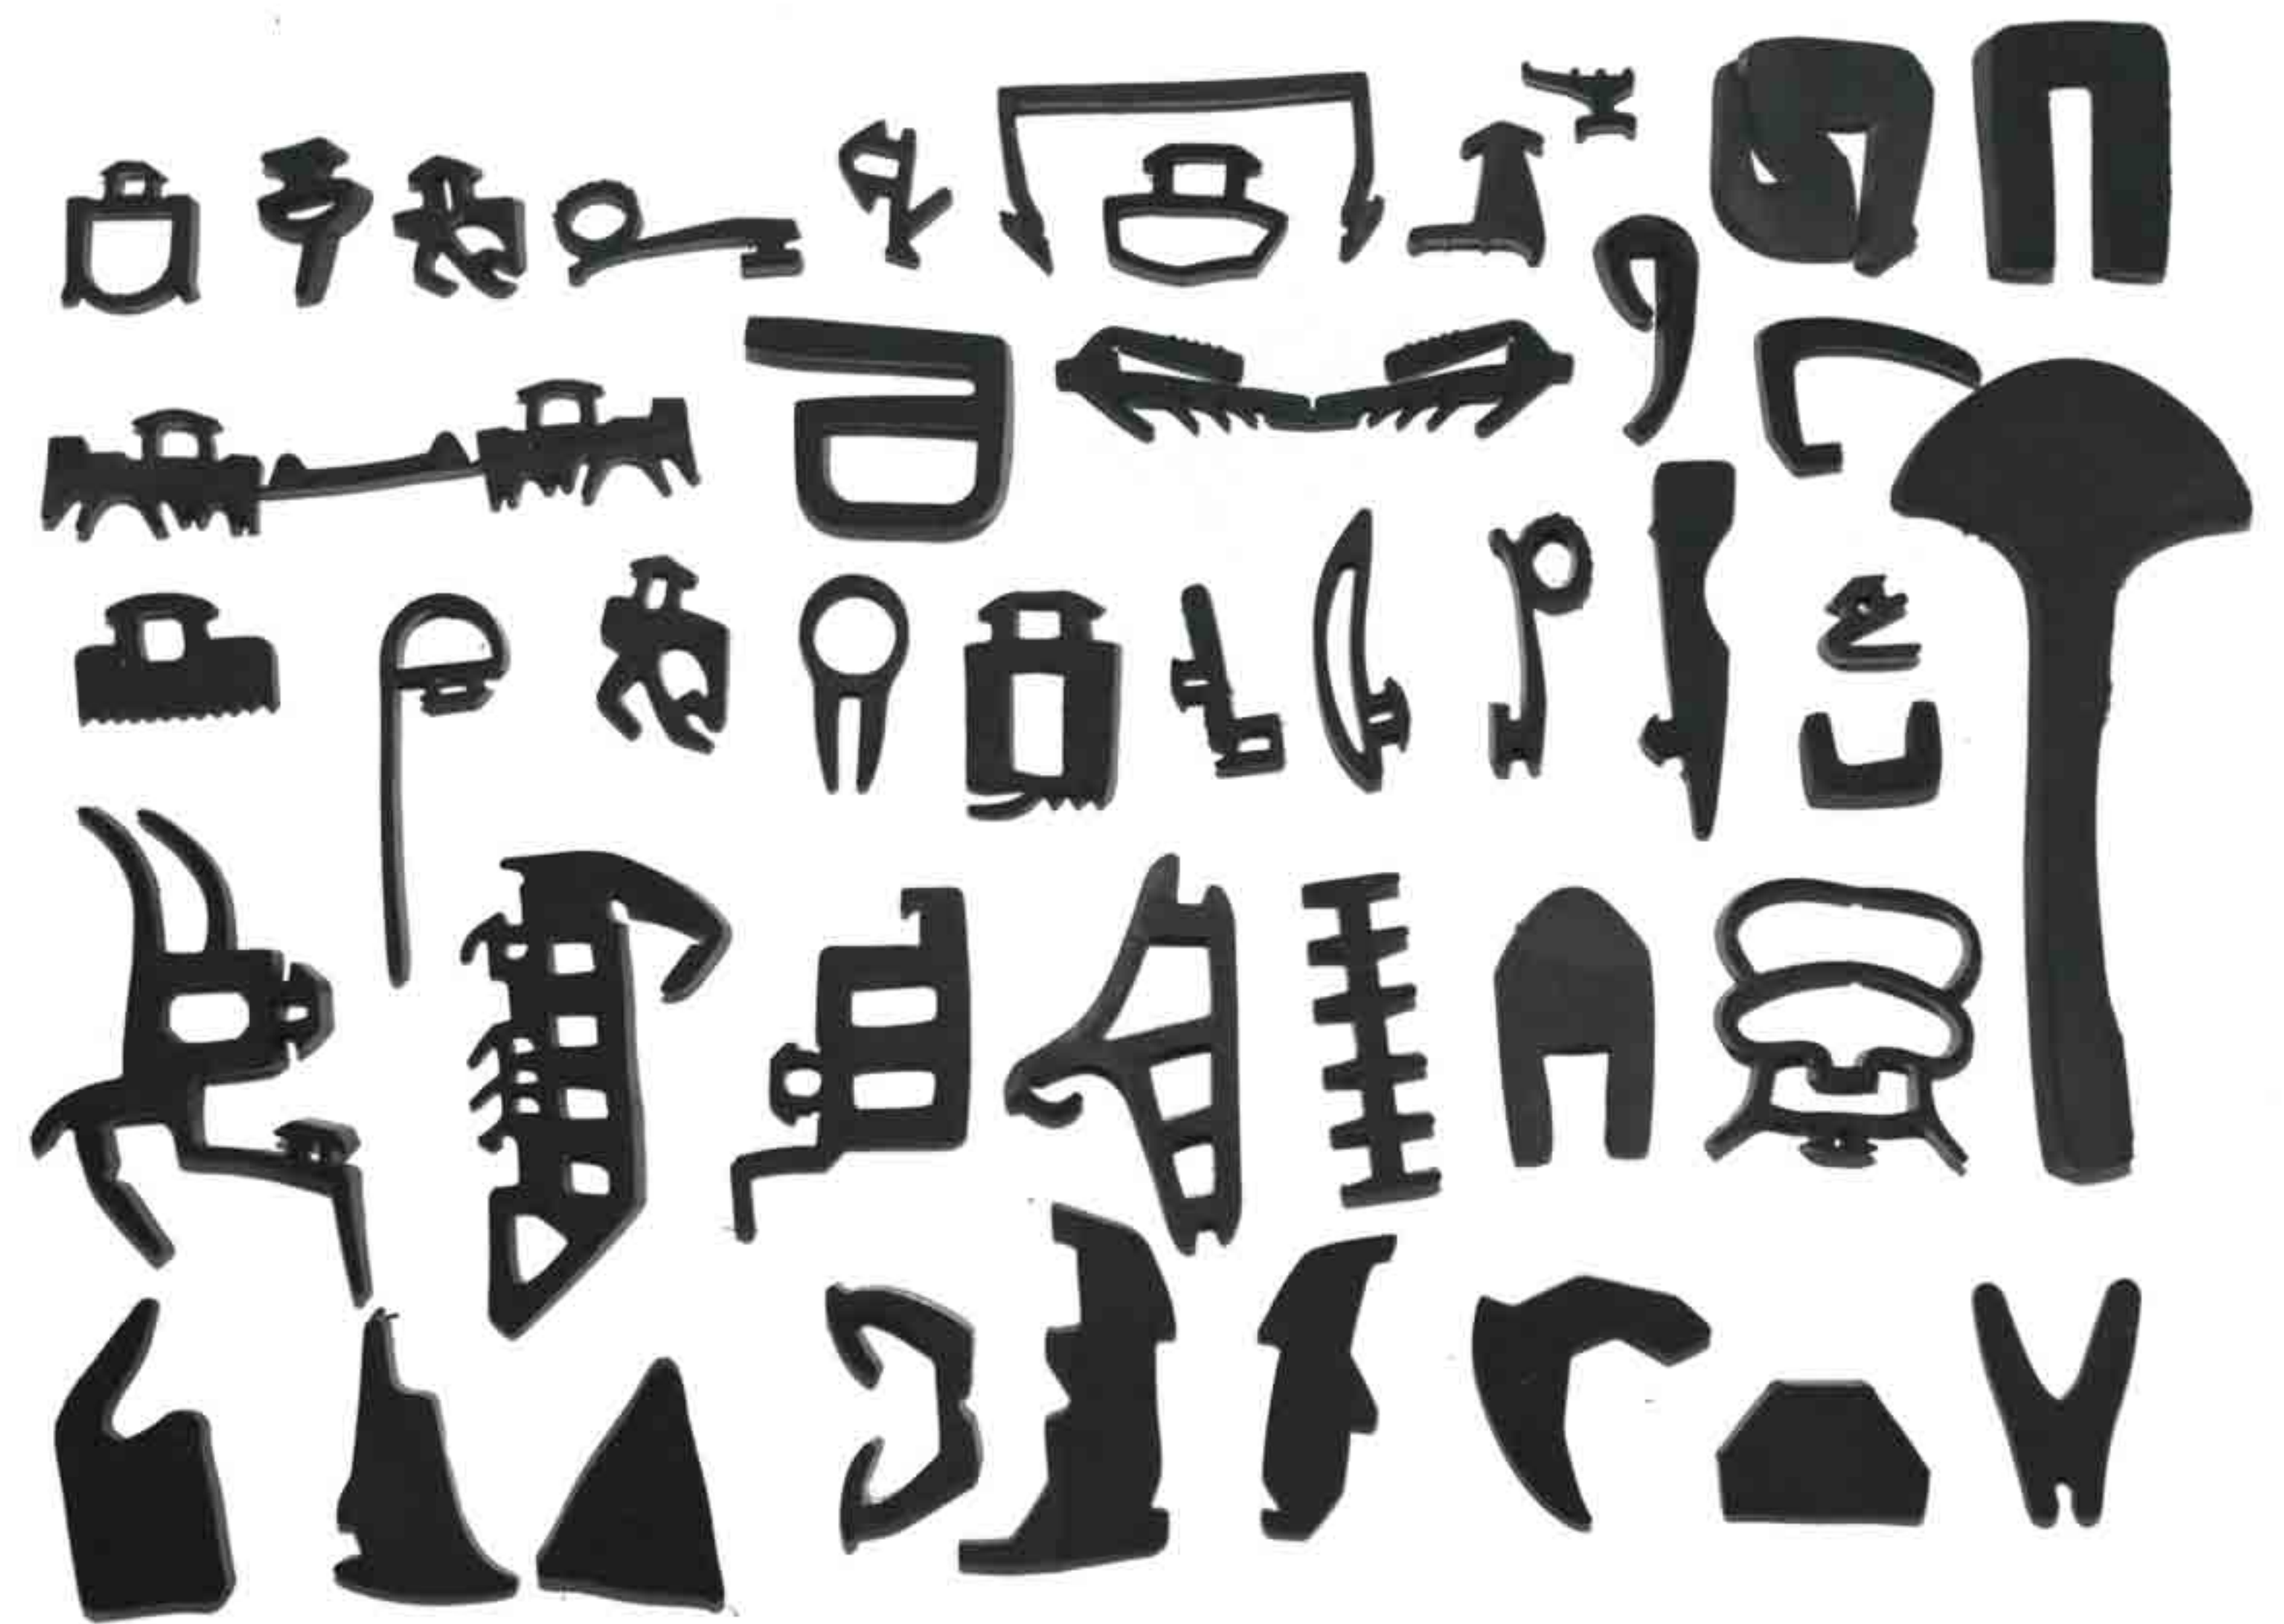

We stock a vast range of O-rings in polymers such as NBR (Nitrile or Buna n), Viton (FKM), and Silicon as per standards of AS 568, BS 4518 and JIS 2401. Our O-rings are available in metric sizes up to 1000mm ID. We also stock O-Ring Cords and O-ring kits.

For your unique requirement we can manufacture O rings from Silicone, EPDM, Neoprene and FFKM also.

Rubber Beadings come in a wide variety of designs and shapes and are used for a large number of applications.

Rubber Beadings are made from Natural, EPDM and Silicone rubber. We stock certain standard sizes and also manufacture as per customer requirements.

Rubber Profiles: Bus Body Profiles, Automotive Profiles, Architectural profiles, Flocked Glass Run Channels, Railway Profiles, Container Seals, Edge Protectors, Sponge rubber profiles, Expansion joints etc..

Oil seals or Shaft seals are an integral part of any rotating and moving part assembly. Oil seals find great deal of usage in gearboxes, hydraulic cylinders, etc. The purpose of the oil seals is to act as a physical barrier retaining the lubricating oil where it is bound to be and prevent the lubricating oil from leaking outside even under high pressure and further it also prevents dirt, contamination and other external entities from entering the system containing the lubricating oil.

We Stock Oil Seals In Polymers such as Viton and NBR ranging from ID 6mm to ID 300mm

Anti-Vibration Mounts are a common and widely used Rubber Components in the Manufacturing Industry. It absorbs and controls vibrations and prevents damage from movement of machines. We stock and manufacture :

- Cylindrical Mounts
- Leveling Foot Mounts
- Base Mounts
- Anti-Vibration pads
- Grommets & Bushings
- Bumpers

Hydraulic Seals are an integral part of any hydraulic system these seals function to keep the system leak proof and saves the system from friction and damage. However it is important to change the seals at regular intervals. We stock the following seals

- Bonded seal
- PU UN seal
- PU Wiper seal
- Metal Wiper seal
- Piston seal

These are available in metric as well as inch sizes

Our stock of Pipe clamps Range From 6mm Dia ID To 88.9mm Dia ID and are available light & heavy duty.

- Single Pipe Clamp
- Double Pipe Clamp
- Twin Pipe Clamp
- Vertical/Horizontal Pipe Clamp

Available in MS, SS and Polyamide plates with Polypropylene, Aluminium and Polymide body.
